Synaptron Systems
WIRELESS SENSORY NETWORKS

Wireless Sensor Network

Our mission is to create an easy to deploy network of "readers" and "devices" to allow for location tracking with key sensor data; allowing for real-time decision making
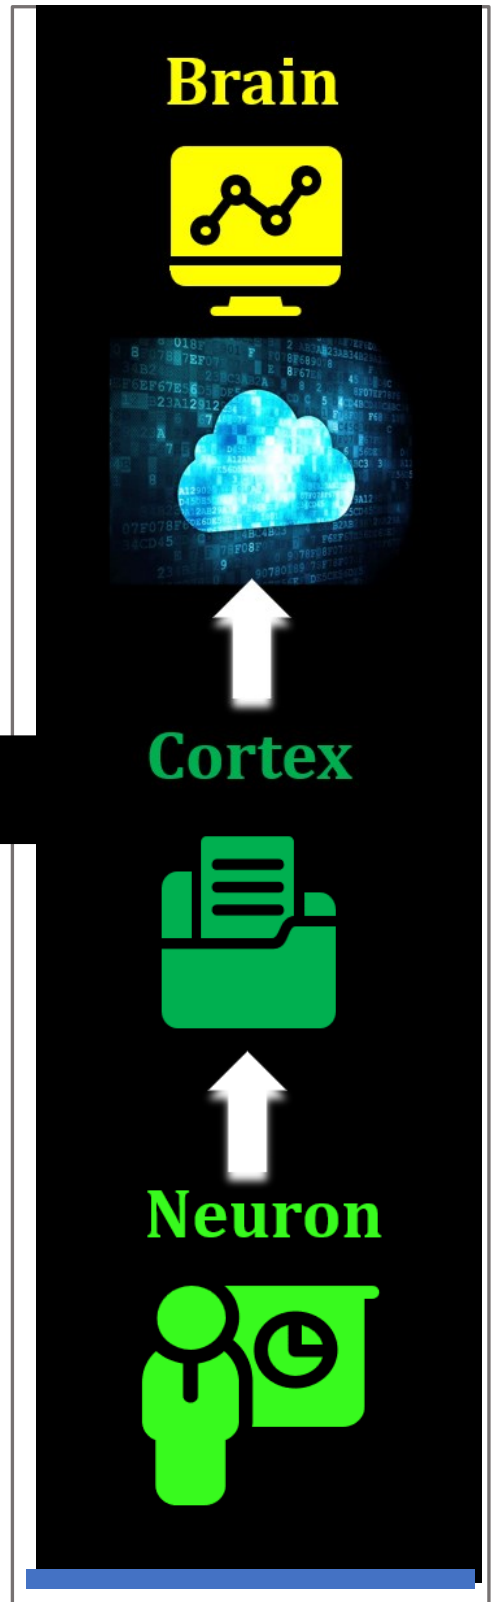

Unlock - Where, What, When & Who

System Overview

Brain – Cloud-based software for track-and-trace of Neuron tagged assets

Cortex – a location (milepost) used to communicate and relay data from Neurons

Neuron – a BLE/WiFi tracking system with embedded sensors: temperature, shock, light sensitivity & other variables as needed

The Synaptron Systems Group

... is comprised of a team with over 120+ years of design, development & deployment expertise
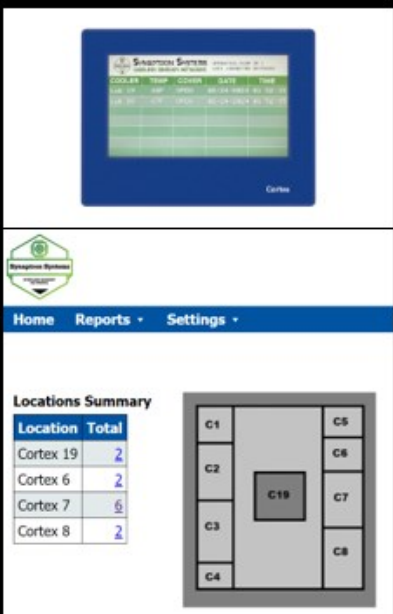

System Architecture

Flexible design that can be quickly set up to allow for a rapid/low-cost deployment of our "plug & play" components

Key System Attributes

❖ Custom Configurable

❖ Zonal Location Tracking

❖ Onboard Accelerometer

❖ Optional Alerts-text/email
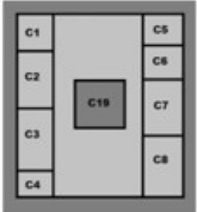

❖ Sensors: Data-Temp, light

❖ Valuable Asset Tracking
